## EDUCATION

---

**CUNY - Brooklyn College** - B.S Computer Science

Sep 2018 - Dec 22

**Courses:** Programming Techniques, Operating Systems, Computer Architecture, Analysis of Algorithms, Programming Languages, Theoretical Comp. Science, Website Design & Implementation

## WORK EXPERIENCE

---

**Assistant Data Engineer**, Palm Beach Agency — *Brooklyn, NY*

*Jun 2023 - Present*

- Collaborated on projects aimed at auditing timesheets to identify instances of company overbilling.
- Administered weekly timesheet entries with precision, ensuring accuracy and error-free records.
- Automated data entry tasks, compressing 3 months work into 2 weeks and optimizing future data entry workflows.

**Research & Development Data Intern**, Becton Dickinson — *Franklin Lakes, NJ*

*May 2022 - Aug 2022*

- Preparing daily, weekly, and monthly data collection reports.
- Revitalized data entry procedure, resulting in enhanced operational efficiency.
- Entry of clinical data on 200+ subjects projects, using Clindex Clinical Trial Software and Veeva Systems

## PROJECTS

---

### NYC Events app

- Constructed a website using JavaScript, HTML, CSS, and PHP, showcasing 100+ trending events in NYC.
- Facilitated event discovery and planning for users.
- Implemented an API for real-time updates with 50+ new events daily.

### Lyrical.ly

- Developed a React.js application for users to visualize and listen to song lyrics.
- Integrated Spotify Web API and Musixmatch API for seamless access to song information and lyrics.
- Enhanced audio interactions with Tone.js and incorporated 3D effects using Three.js.
- Backend data management utilizing Firebase.

### Covid Tracking App

- Created a COVID-19 tracking app using React.js, HTML, and CSS, sourcing data from the World Health Organization API.
- Designed an interactive visual map displaying over 679 million cases.
- Empowered users to explore pandemic data by country, region, and timeline, utilizing the health.gov API.

## LANGUAGES & TECHNICAL TOOLS

---

**Languages:** Java, Python, SQL, JavaScript, Typescript, C, C++, HTML, CSS

**Frameworks:** Github, ReactJs, Veeva, Excel, Visual Studio, Unity, Node.js, API, Postman
