Devin Lin

About Me

I am a software engineer with a passion in front-end. Through my experience in creating user-friendly interfaces, I have developed a strong passion for designing intuitive and visually appealing apps.

Projects

NYC Events app

Used Javascript, HTML, CSS, and PHP to create a website that displays 100+ trending events in New York City along with a guide to entertainment activities to simplify the planning process for users. Implemented an API that updates the website with 50+ new events daily to ensure the platform remains up-to-date.

Covid Tracking App

Developed a COVID-19 tracking app using React.js, HTML, and CSS, with data from World Health Organization API and the CDC, featuring an interactive visual map that displays over 679 million cases, enabling users to explore data by country, region, or timeline and gain valuable insights about the pandemic.

Cooking Recipes App

Created a meal planning app with React.js to show macronutrient and calorie tracker, featuring a database of over 10,000 recipes to aid individuals in their weight-loss or weight-gain goals.

Work Experience

May - Aug 2022

Data Entry Intern
Becton Dickinson

Preparing Daily, weekly, and Monthly reports/meetings. Collect, organize, analyze, and upload significant amounts of information with attention to detail and accuracy. Entry of clinical data on a number of high-priority projects, using Clindex Clinical Trial Software and Veeva Systems

2018 - 2021

Barista
Gongcha

Attend customers to pick their desired beverage. Manage the cashier to provide the correct amount of change. Memorizing procedures and ingredients to prepare beverage for the customers

Education

Bachelors of Computer Science

Brooklyn College, US
2018-2022

Skills

- Analytic Skills
- Debugging
- Problem solving
- Web Design and Deployment
- Interpersonal Skills
- Time Management
- Teamworking
- Decision Making

Languages

- Java	- C++
- Python	- HTML/CSS
- SQL	- SwiftUI
- JavaScript	- Swift
- C	- JSON
- AWK	

Frameworks

- Github	- PySpark
- Postman	- Excel
- ReactJs	- Docker
- AWS	- VSC
- Node.js	- Unity
- Veeva Vault
